A BIBLIOGRAPHY ON DEVELOPMENT

INTRODUCTION

This bibliography attempts to put together in one publication, the majority of works dealing with the development of Guinea, Ivory Coast, and Senegal. Development is here defined in the broadest sense and encompasses education, agriculture, health, industry, and politics, as well as economic growth.

Certain areas are deliberately incomplete: Publications of the three countries' governments are comprehensively noted in French-Speaking West Africa: A Guide to Official Publications (Washington, D.C.: Library of Congress, 1967). Only a few of them are noted here. Furthermore, no attempt at presenting the many historical and ethnographic works has been made as they are thoroughly covered elsewhere.

The index provided here is simply for quick reference and should not be considered complete. The reader should note that works referring to one country covered here and another not covered (e.g. Ivory Coast and Ghana) are listed in the section on the country covered here (e.g. Ivory Coast) and are not found in the General Section. On the other hand, works covering more than one of the countries covered here (e.g. Guinea and Senegal) are found in the "General" section. The works found in the various sections

on government publications include publications of all governments and international organizations.
